

STEAM LINK®

www.steamlink.com.au

EFFICIENCY

REDUCES

ENERGY INTAKE / LOST PRODUCTION TIME / CARBON EMISSION

ACTIVE INSTALLATION

Yesterday's steam distribution system, supporting today's process application.

What's wrong?

Take off points, insulation missing, and no condensate discharge pots.

Problems:

Increased Energy consumption / heating environment
Reduced energy supply capacity
Generating excessive carbon emission

SOLUTION

Install condensate drain pot / c/w Steam Trap
Replace missing insulation, renew faulty one
Recover condensate

EFFICIENT STEAM SYSTEMS DELIVER EFFECTIVE PROCESS STEAM
