

STEAM

On-site generated and in-house managed, critical process

ENERGY

Only a site specific designed, installed and process integrated **steam energy investment** is capable to support the working or proposed steam energy powered venture, dependable, and cost effective.

Summary of TESTIMONY

I recommend STEAM LINK®, as we achieved substantial energy savings, plus improved plant performance, all adding up to a reduced production cost per unit.

Mr. Jamie Pacey, Maintenance Manager
JAMES HARDIE Australia Pty. Ltd. Meeandah Plant, Queensland
